DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by St. John et al (U.S. Patent No. 4,485,982)

With respect to Claims 1-29, St. John et al, Figures 1-15, teach a method for correcting web deformation during a roll-to roll process comprising: initiating a roll-to-roll process involving a flexible web substrate, detecting deformation in the flexible web substrate during the roll-to-roll process; and dynamically aligning the flexible web substrate based on the detected deformation; wherein detecting deformation in the flexible web substrate includes utilizing optical markings on the flexible web substrate to detect the deformation; comparing the detected deformation with a desired deformation; generating an error signal based on the comparison; and generating a correction signal to be utilized to dynamically align the flexible web substrate.
